

KINGSWAY PLAYGROUP & PRE-SCHOOL CENTRE

MEDICATION

At Kingsway Playgroup & Pre-School Centre, we promote the good health of children attending playgroup and take necessary steps to prevent the spread of infection (see sickness and illness policy). If a child requires medicine, we will obtain information about the child's needs for this and will ensure this information is kept up to date.

We follow strict guidelines when dealing with medication of any kind in the playgroup and these are set out below.

Medication prescribed by a doctor, dentist, nurse or pharmacist

- Prescription medicine will only be given when prescribed by the above and for the person named on the bottle for the dosage stated
- Medicines must be in their original containers with their instructions printed in English
- Those with parental responsibility for any child requiring prescription medication should hand over the medication to a member of staff who will then note the details of the administration on the appropriate form
- Those with parental responsibility must give prior written permission for the administration of each and every medication. However, we will accept written permission once for a whole course of medication or for the ongoing use of a particular medication under the following circumstances:
 1. The written permission is only acceptable for that brand name of medication and cannot be used for similar types of medication, e.g. if the course of antibiotics changes, a new form will need to be completed
 2. The dosage on the written permission is the only dosage that will be administered. We will not give a different dose unless a new form is completed
 3. Parents must notify us IMMEDIATELY if the child's circumstances change, e.g. a dose has been given at home, or a change in strength/dose needs to be given.
- The playgroup will not administer a dosage that exceeds the recommended dose on the instructions unless accompanied by written instructions from a relevant health professional such as a letter from a doctor or dentist
- The parent must be asked when the child has last been given the medication before coming to playgroup; and the staff member must record this information on the medication form. Similarly, when the child is picked up, the parent or guardian must be given precise details of the times and dosage given throughout the day. The parent's signature must be obtained at both times
- At the time of administering the medicine, a member of staff will ask the child to take the medicine, or offer it in a manner acceptable to the child at the prescribed time and in the prescribed form, and another member of staff will witness this being done. (It is important to note that staff working with children are not legally obliged to administer medication)

- If the child refuses to take the appropriate medication, then a note will be made on the form
- Where medication is “essential” or may have side effects, discussion with the parent will take place to establish the appropriate response.

Non-prescription medication will not usually be administered

- For any non-prescription cream for skin conditions e.g. Sudocrem, prior written permission must be obtained from the parent and the onus is on the parent to provide the cream which should be clearly labelled with the child’s name and in its original labelled container.

Staff medication

All playgroup staff have a responsibility to work with children only where they are fit to do so. Staff must not work with children where they are infectious or too unwell to meet children’s needs. This includes circumstances where any medication taken affects their ability to care for children, for example, where it makes a person drowsy.

If any staff member believes that their condition, including any condition caused by taking medication, is affecting their ability they must inform their line manager and seek medical advice. *The playgroup manager/person’s line manager/registered provider will decide if a staff member is fit to work, including circumstances where other staff members notice changes in behaviour suggesting a person may be under the influence of medication. This decision will include any medical advice obtained by the individual or from an occupational health assessment.

Where staff may occasionally or regularly need medication, any such medication must be kept in the person’s locker/separate locked container in the staff room or playgroup room where staff may need easy access to the medication such as an asthma inhaler. In all cases it must be stored out of reach of the children. It must not be kept in the first aid box and should be labelled with the name of the member of staff.

Storage

All medication for children must have the child’s name clearly written on the original container and kept in a closed box, which is out of reach of all children.

Emergency medication, such as inhalers and EpiPens, will be within easy reach of staff in case of an immediate need, but will remain out of children’s reach.

Any antibiotics requiring refrigeration must be kept in a fridge inaccessible to children.

All medications must be in their original containers, labels must be legible and not tampered with or they will not be given. All prescription medications should have the pharmacist’s details and notes attached to show the dosage needed and the date the prescription was issued. This will all be checked, along with expiry dates, before staff agree to administer medication.
